

Automation Consultant

Shadow Automation LLP is a uniquely qualified business providing engineering based and outsourced project support or personnel support. We offer both engineering and project management from initial phase to final handover. On the engineering front we provide control system hardware, software design, along with electrical panels and electrical design based on requirement.

Expertise

We specialize in system integration including PLC and Drive programming with expertise in many different platforms.

Manufacturing Units

We produce user-configured and custom-built control panels designed to meet your automation needs. We have an extensive network of electrical control manufacturers to ensure a variety of products are available

Our Vision

Shadow automation gives emphasis on machine vision and can provide you with the knowledge and expertise to accomplish your automation goals. We provide control systems or complete automation solutions to achieve consistent throughput and quality.

Services

We continuously consider ways to promote process/procedure best practice, benchmarking and improvement.

Our project center of competency encompasses diversified controls and automation system experience and industrial specific process know-how. We are your true one-stop-shopping partner providing turnkey engineering projects as well as modernization projects within various industrial automation arenas. Highlighted project scopes.

Services in field of:

1. PLC, Drive and HMI/SCADA related control Automation.
2. Controls Design and engineering.
3. Instrumentation Equipment solution.
4. Electrical and Electronics solution.
5. Maintenance or Annual maintenance.
6. Process based engineering.
7. Commissioning and startup.
8. IT/Networking.
9. Software based tools provider as per customer requirement.
10. Project management & related documentation.
11. Integration of system.
12. Field Electromechanical Engineering.
13. Engineers, Technicians and Electricians as a support resource.

Controls Automation provider of below Brands.

1. SIEMENS
2. ALLEN BRADLEY /ROCKWELL
3. SCHNEIDER
4. VIPA
5. ABB
6. PHOENIX
7. DELTA

Types of Automation service provider.

1. Process Automation
2. Factory Automation
3. Robotics Automation
4. Building Automation

Product Categories

- AC/DC Motor Drives
- AC Motors
- AC Motor Starters
- Alarm Management
- Analyzers & Monitors
- Automated Test Equipment
- Building Automation Systems
- CNC Controllers
- Color Sensors
- Communications / Network Software
- Console Enclosures
- Control System Security
- Control Valves
- DIN Connectors
- Distributed & Supervisory Control Systems / DCS & SCADA
- Electronic Counters / Timers
- Engineering/Development
- Flow Meters
- Force / Load Sensors
- Gearboxes / Gear Heads
- General Purpose Indicators
- Computers
- Historian, Data Collection
- Human Machine Interfaces / Operator Interface Terminals
- Industrial Computers
- Industrial IT Security
- Instrumentation
- Instrumentation Engineering / Design
- Integrated Control Systems
- I/O Modules
- Laser Scanners
- Level Transmitters
- Linear Actuators
- Linear Position Sensors / Switches
- Manufacturing Support Software
- Mechanical Components
- Motion Controllers
- Network Security
- Network Switches

For Our Customers:

Shadow Automation helps industrial customers meet their business objectives by providing leading technology and services, domain expertise, and global engineering and support resources. Our broad portfolio of products and services can be tailored to meet process automation needs, from production and supply chain management to project management services, control systems and field devices.

From cost-effective components to highly integrated systems, we offer a full range of machine control and information solutions to meet your needs.
